

## ZHF Modifications:

Injection point:	All filter and all applications, except installation the last 5 years
Spray bar upgrade;	All filters older than 10 -15 years.
Durafil upgrade;	All filter dependent on application, has been performed on none Schenk filters with success. General rescreening upgrades, old weak flat element to new strong Integrated hub elements
Semiautomatic elements lift	All Primus 1 and II in D size (mostly south-America + 1 Canada
Upgrade drive:	
Variable direct drive;	All old hydro coupling drives
New program discharge	All automatic filter installations with electric drives
Adapted manual program	All filter with electric drives.
Adapted for hydro drive	All large older than 10 years filters.

Pricing and delivery will have to be set by service either from Germany for standard product, or what we can offer locally, some of the alternatives we probably have to develop ourselves.

Systems for inspection and upgrades have to be worked out by service, and make the customer aware of service opportunities.
